SECURE CODING TRAINING SIDE-BY-SIDE COMPARISON

Security Journey

Secure Flag

TECHNICAL DEPTH OF CONTENT

Multiple levels of progressive content plus topic areas not covered by other secure coding competitors (AI/LLM others).

Large quantity of labs with limited format variety focused on developers.

VIDEOS WITH IMPACT

Conversational podcast-style videos featuring industry experts who clearly describe concepts.

Limited quantity of brief animated videos with voice over.

HANDS-ON TRAINING

Multiple types of lessons that require coding in a live web app to apply learned concepts with pre-warmed sandboxes for positive learner experience.

High quantity of lab style hands-on content, but the labs can take up to a minute to load.

CUSTOMIZABLE ROLE-SPECIFIC LEARNING PATHS

Customizable pre-built paths for compliance, topics and more than a dozen discrete development team roles.

Customizable pre-built learning paths based upon language, level, or status.

SECURITY CHAMPION PROGRAM MANAGEMENT

Purpose-built function for tracking Security Champion practical hands-on activities.

No function for managing security champion activities.

ANALYTICS & INSIGHTS

Reporting that can be filtered on any user property from SSO or SCIM and includes reports that show knowledge improvement.

Reporting functionality with separate reports for learning paths, labs, leaners, competency score, and accuracy score.

CUSTOMER SUCCESS AND SERVICE

Every customer receives an assigned CSM who proactively provides program guidance. Learners have access to in-app chat during business hours.

Few resources available to support customers and professional services with all based in Europe.

ENTERPRISE-GRADE FEATURES

Platform customization to align program themes, SOC2 compliant to protect data, SSO and SCIM support for easy user management, WCAG support for impaired learners across all lessons.

SecureFlag doesn't appear to have any of these features.

PRODUCT FOCUS

100% dedicated to training members of the SDLC to create more secure software.

Small company with threat modelling and secure coding training products.
